

Companion analysis: changing beta at $x = 0.01$

Beta sweep at $x = 0.01$

Sensitivity interval evaluated at the model-implied $\delta\text{a}(\text{beta})$

$\delta\text{a}(\text{beta})$ versus $\Delta_{\text{crit}}(\text{beta})$

Green band: $\delta\text{a}(\text{beta}) < \Delta_{\text{crit}}(\text{beta})$
