

Oracle vs. Sensitivity Identification Intervals — Gaussian Copula

Ribbons shrink toward oracle (black) as researcher knowledge about $d(x)$ increases.
Dashed line: $\mu_{\text{obs}}(x)$. Oracle interval is EXACT (sharp); others are conservative.

Oracle vs. Sensitivity Identification Intervals — FGM Copula

Ribbons shrink toward oracle (black) as researcher knowledge about $d(x)$ increases.
Dashed line: $\mu_{\text{obs}}(x)$. Oracle interval is EXACT (sharp); others are conservative.
